GE Information Services

Up-Stream Logistic

In-Transit inventories can be maintained at the appropriate levels.

- Improved Customer Service
- Improved Cash Flow

Down-Stream Logistic

Up&Down-Stream Logistic

Reduced Logistic Pipeline

- **Data Integrity realised through automation and EDI**
- **Visibility of in-transit inventory from order to delivery and pro-active notification of delays**
- **Eliminate manual tracking of orders and diversionary activities caused by non compliance**
- **Management of the “service promise” through pro-active notification of and historical reporting**
- **Automation of the audit and payment process for carriers**

The Results....improved customer service

- ***Start the Planning process Today !!!!***
- ***Acceptance and commitment for a project takes a minimum of 3 months***
- ***Automation of the process with your external trading partners is not an “overnight” process and may take 3-9 months***

“Supply Chain visibility is key to improved customer service”

Thank you!
