Help

This a test gateway to receive Tesco order messages and send Tesco invoice messages from a web browser to the GEIS Tradanet EDI service. Netscape Navigator version 3 is recommended for all the features to work correctly. It is also recommended that you resize your browser window to at least 800x600 pixels if possible.

Please select one of the commands above. Use "In box" to view incoming order messages and automatically turnaround an order to generate an invoice, "Out box" to view details of invoice messages you have sent and "Forms" to load invoice forms you have previously saved.

If this is the first time you are accessing this system then select "Details" to set your EDI password and company details.

Note that in order to print documents you can use the browser "Print frame" option under the File menu or select the print icon. You can also save documents to your local disk in HTML format using the browser "Save frame as" option.
